Don't have a Take Away have a Jamaica Way!

Jamaican food is a wonderful melange of foods and flavours from around the world including Spanish, British, African, Indian and Chinese as well as of course the indigenous people.

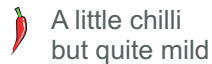

This influence plus the tailoring of recipes to the local available produce and local preferences has produced some incredible flavours and dishes.

Probably best well known is the famous Jerk Chicken as a tasty and spicy barbecue flavouring.

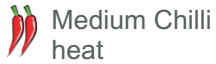

Jamaica is also famous for it's curries which come in many varieties and flavourings, similar to Indian curries but with subtle variations including allspice and scotch bonnet peppers giving them a little more body and flavour than most other curries.

Jamaican food is highly spiced and often uses Scotch bonnet peppers but most dishes are quite mild in heat and we will make our dishes as hot or as mild as you prefer. Below is a key to the heat.

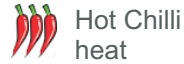

Take a chance on trying some Jamaican food and we are sure you will not regret it. Call us now, stick on some Bob Marley and relax while we cook your dinner!
